

PP PUSH-FIT DRAINAGE SOLUTIONS CATALOGUE

"SUPERIOR GERMAN QUALITY"

ABOUT

The Egyptian German Industrial Corporate - EGIC was founded in 1991 to market all types of sanitary products and related accessories. Joining Bänninger, our German partners, we introduced PP-R systems to the water supply in the Egyptian market, then expanded our entire production to produce and market all types of reliable plumbing and sanitary products.

EGIC has established top-class manufacturing facilities; including four facilities in Egypt and one in Germany, where we produce water supply and drainage solutions from numerous plastic materials and copper (polypropylene, PVC and polyethylene) under the best-known brands; Bänninger, Kessel, and Smart Home. One of those four factories is the largest copper foundry in the Middle East that manufactures the purest bronze bars, valves, and other related accessories.

By constantly adapting our products to the needs of the market, EGIC eventually became a trendsetter and a leading developer of benchmark quality in polymer and plastic products. We manufacture an economically innovative wide product range of PP-R pipes and fittings for drinkable cold & hot water as well as PP & PVC pipes and fittings for drainage, where we provide complete home solutions for different residential and industrial projects across the world.

Our applied raw material technologies optimize the material characteristics for the protection of the environment. The use of polypropylene raw materials for manufacturing ensures a socially compatible, hygienic and healthy packaging for the most precious commodity: clean drinking water

Our promise is to not only satisfy but to also exceed our customers' expectations by offering them the highest quality products as well as a wide range of support services. Our outstanding customer relations skills ensure efficient delivery, which in return results in customer loyalty.

At EGIC we believe in teamwork, progress, honesty, open communication and a better tomorrow.

*Founded by
Omar Safey El Dine*

EGIC company was established in early **1991** with the intent to market all types of plumbing-related products. Overtime, **EGIC is a pioneer and market leader** in manufacturing pipes and fittings for water supply and drainage, using numerous plastic materials: Polypropylene, PVC and Polyethylene. As a result, the company was positioned as a main sanitary solution supplier in the construction value chain, and was known for its superior, high-quality, German products.

EGIC's Timeline since 1991

1991	EGIC was founded as an importer of top-class plumbing products.
1995	EGIC was the first company to introduce PPR water supply solutions to the Egyptian Market.
1997	EGIC launched its integrated customer service loyalty program. EGIC introduced a new PP push-to-fit drainage solutions.
2000	EGIC started its first corporate social responsibility initiative via establishing Nahdet Beni Suef Foundation.
2001	EGIC established its first manufacturing facility to locally produce PPR water supply solutions.
2006	EGIC expanded to its second manufacturing facility to locally produce UPVC drainage solutions.
2013	EGIC implemented the SAP system. EGIC established the Egyptian Plumbers Foundation as part of EGIC's corporate social responsibility program.
2014	EGIC launched its PVC cleaning cement & adhesives as well as new pumping systems in order to provide an integrated and complete home solution strategy. EGIC acquired its third manufacturing facility.
2016	EGIC established one of the largest bronze and brass foundries in the Middle East.
2019	EGIC expanded its manufacturing process to produce the new Kessel shower drains and Smart Home accessories.

EGIC Facilities

- Cairo Head Office.
- Bani Suef Manufacturing Facility.
- Bani Suef Bronze/Brass Foundry.
- October | Manufacturing Facility.
- October II Manufacturing Facility.
- Customer Service Branches Across Egypt.

QUALITY ASSURANCE

Our promise is to be a dependable provider of comprehensive and integrated home solutions of superior German quality, with the support of our exemplary customer care service, comprehensive warranties, and outstanding distribution network.

EGIC’s entire production line has been adjusted to fit European standards, which have been previously approved and certified by different accredited independent international institutes.

Those standards are being sustained by our Quality Assurance laboratories which test all raw materials, products and effectiveness.

All products undergo tests in abnormal conditions to guarantee optimum quality, through using the highest quality raw material BOREALIS, basell, implying the required standards of the following certifications: DVGW, SKZ, EOS, GL, NOPWASD, IGH and Certificates of quality process ISO 9001, ISO 14001, ISO 45001, ISO 17025.

COMPLETE HOME SOLUTIONS

Home is where most of our time is spent, and investing in high-quality water Plumbing solutions is of the upmost importance, in order to ensure a stable water supply for a peaceful and hassle-free life.

- 1 PP-R Water Supply Solutions
- 2 PPR-R Water Supply Solutions with UV Resistance
- 3 PVC Drainage Solutions
- 4 Floor Drains
- 5 Gully traps
- 6 Inspection Chamber for Outdoor Drainage Solutions
- 7 Backwater Valve for Outdoor Drainage Solutions
- 8 Underground Push to Fit Drainage Solutions
- 9 Lifting Station for Basements
- 10 Water channels for Garage and Swimming Pools

Related Plumbing Solutions: Valves, Flexible Hoses, Lubricant, Adhesives, Waterproof cementitious coating and water pumps.

ABOVE GROUND PRODUCTS

Technical Information

EGIC offers the German Kessel Aboveground Systems to be used in and around building installations, which are designed from highly flexible and durable materials for different operating conditions, and characterized by their ease of installation and maintenance by means of non-permanent installation systems and without any adhesive or harmful materials. This results in efficient operation for long years on end, under the guarantee of EGIC.

These systems are distinguished by their vast variety of designs and sizes for pipes, fittings and floor drains to fit all possible uses and to give flexibility to both the designer and the plumber in the design and installation process even in hard and narrow locations and routes.

Kessel Aboveground Systems are made of high quality polypropylene PP, designed according to European standard specifications DIN EN 1451, and integrated with kessel floor drains which are made of Acrylonitrile-Butadiene-Styrene (ABS) and high-quality stainless steel 304 in a variety of sizes and designs to fit all uses, styles and finishes, in order to guarantee ease of inspection as well as efficient and quick drainage.

Kessel Aboveground Systems start from the 32mm size, which is suitable for air-conditioning discharge usage, up to the 160mm size, which is suitable to use in whole building discharges. Additionally, there is also a variety of sizes in between, to suit different building discharges.

These Aboveground Systems use two main designs for both body and socket gaskets, in order to suit the operating conditions, and to give pipes and fittings extra strength in loading, withstanding and sealing. Kessel Aboveground Systems are suitable for all water and sewage gravity discharging with operational temperatures that reach up to 95°C as well as an efficient solids slipping system and excellent resistance to most chemicals for several long years, in addition to the ability to withstand all building loads with the proper installation.

SBR GASKET

Made of special rubber types used for push and fit drainage solutions where users can easily reassemble the joints on-site.

Kessel gaskets are known for their flexibility and durability in preventing dust and eliminating leakage.

Kessel underground drainage systems have the ability to withstand external pressures up to 4000 N/m2.

Kessel SBR Gasket

Composed of 4 ribs to prevent dust, tighten the installation and eliminating leakage.

FLOOR DRAINS

Kessel Floor / Shower drains

Kessel drains are designed with superior German quality to receive and convey wastewater to the main sewerage. These drains fit modern and elegant bathrooms, floors, kitchens, or roof areas where standing water is expected. We offer a large choice of drain covers made of stainless steel to fit modern and elegant designs and withstand up to 300 Kg also plastic covers that fit the main floor drain indoor. Each drain includes a special removable odor trap to prevent unpleasant odors. Kessel drain bodies are made of ABS to tolerate heavy loads with excellent resistance to chemicals and adjust high flow rates.

Point Drain made of ABS with circular removable odor trap	Open stainless-steel cover 304	150x150 mm
Includes installed trap sealed with O-ring to prevent unpleasant odors	Excellent resistance for chemicals and anti-rust that withstand up to 300Kg	lateral outlet Ø 50
36 L/min. Flow rate at installation height of 93 mm		Adjustable height between 93 mm and 148 mm

SHOWER & FLOOR DRAINS

375020030 Point Drain with vertical outlet

<div></div>		
Description	Cover	Dimensions
Point drain made of ABS with circular removable odor trap	Open stainless-steel cover 304	100x100 mm With Vertical outlet Ø 50
Sealing water height 50 mm, with fixed lip seal.	Excellent resistance for chemicals and anti-rust that withstand up to 300Kg	
Drainage capacity 36 L/min. Flow rate. Installation area 220x180 mm		

375020032 Point Drain with vertical outlet

<div></div>		
Description	Cover	Dimensions
Point drain made of ABS with circular removable odor trap	Open stainless-steel cover 304	150x150 mm With Vertical outlet Ø 50
Sealing water height 50 mm, with fixed lip seal.	Excellent resistance for chemicals and anti-rust that withstand up to 300Kg	
Drainage capacity 36 L/min. Flow rate. Installation area 220x180 mm		

375020031 Point Drain with vertical outlet

<div></div>		
Description	Cover	Dimensions
Point drain made of ABS with circular removable odor trap	Open stainless-steel cover 304	100x100 mm With Vertical outlet Ø 75
Sealing water height 50 mm, with fixed lip seal.	Excellent resistance for chemicals and anti-rust that withstand up to 300Kg	
Drainage capacity 36 L/min. Flow rate. Installation area 220x180 mm		

375020033 Point Drain with vertical outlet

<div></div>		
Description	Cover	Dimensions
Point drain made of ABS with circular removable odor trap	Open stainless-steel cover 304	150x150 mm With Vertical outlet Ø 75
Sealing water height 50 mm, with fixed lip seal.	Excellent resistance for chemicals and anti-rust that withstand up to 300Kg	
Drainage capacity 36 L/min. Flow rate. Installation area 220x180 mm		

SHOWER & FLOOR DRAINS

375020037 Point Drain with vertical outlet

Description	Cover	Dimensions
Point drain made of ABS with circular removable odor trap	Tileable stainless-steel cover 304 to install the ceramic into to give the floor a homogenous appearance	100x100 mm With Vertical outlet Ø 50
Sealing water height 50 mm, with fixed lip seal.	Excellent resistance for chemicals and anti-rust that withstand up to 300Kg	
Drainage capacity 30 L/min. Flow rate. Installation area 220x180 mm		

375020035 Point Drain with vertical outlet

Description	Cover	Dimensions
Point drain made of ABS with circular removable odor trap	Tileable stainless-steel cover 304 to install the ceramic into to give the floor a homogenous appearance	150x150 mm With Vertical outlet Ø 50
Sealing water height 50 mm, with fixed lip seal.	Excellent resistance for chemicals and anti-rust that withstand up to 300Kg	
Drainage capacity 36 L/min. Flow rate. Installation area 220x180 mm		

375020036 Point Drain with vertical outlet

Description	Cover	Dimensions
Point drain made of ABS with circular removable odor trap	Tileable stainless-steel cover 304 to install the ceramic into to give the floor a homogenous appearance	100x100 mm With Vertical outlet Ø 75
Sealing water height 50 mm, with fixed lip seal.	Excellent resistance for chemicals and anti-rust that withstand up to 300Kg	
Drainage capacity 30 L/min. Flow rate. Installation area 220x180 mm		

375020034 Point Drain with vertical outlet

Description	Cover	Dimensions
Point drain made of ABS with circular removable odor trap	Tileable stainless-steel cover 304 to install the ceramic into to give the floor a homogenous appearance	150x150 mm With Vertical outlet Ø 75
Sealing water height 50 mm, with fixed lip seal.	Excellent resistance for chemicals and anti-rust that withstand up to 300Kg	
Drainage capacity 36 L/min. Flow rate. Installation area 220x180 mm		

SHOWER & FLOOR DRAINS

375029974 Kitchen drain

Description	Cover	Dimensions
Kitchen drain made of ABS with circular removable odor trap	Open stainless-steel cover 304	100x100 mm
Sealing water height 50 mm, with fixed lip seal.	Excellent resistance for chemicals and anti-rust that withstand up to 300Kg	Lateral inlet Ø 40 and integrated body gasket
Drainage capacity 48L/min. flow rate. Installation area 260x180 mm Article number: 42701.20		Flexible lateral outlet Ø 50

375029966 Point drain with lateral outlet

Description	Cover	Dimensions
Point drain with lateral outlet made of ABS with circular removable odor trap	Open stainless-steel cover 304	100x100 mm
Sealing water height 50 mm, with fixed lip seal.	Excellent resistance for chemicals and anti-rust that withstand up to 300Kg	Flexible lateral outlet 75
Drainage capacity 48L/min. flow rate. Installation area 220 x 180 mm Article number: 40170.20		

FLOOR DRAINS

373099939 Floor Drain

Description	Cover	Dimensions
Floor Drain in ABS with removable odor trap	Fits with all Kessel floor/bathroom drain upper sections (150x150)mm	Three lateral Ø50 inlets with one lateral Ø75 outlet
Hydraulically designed for self-cleaning and maximum flow		Outlet, reduction available Ø50 / Ø75
63 L/min. Flow rate		Inlet, reduction available Ø40 / Ø50
Pipe connection can be glue fitted or push fitted with available gaskets		
Chemical resistance		
Impact resistance		

SBR GASKET

Made of special rubber types used for push and fit drainage solutions where users can easily reassemble the joints on-site. Kessel gaskets are known for their flexibility and durability in preventing dust and eliminating leakage.

For Drainage Solutions (32-110mm)

For Drainage Solutions (110-200 mm)

375020002 Floor Drain

Description	Cover	Dimensions
Floor Drain in ABS with removable odor trap	Fits with all Kessel floor/bathroom drain upper sections (150x150)mm	Three lateral Ø63 inlets with one lateral Ø75 outlet
Hydraulically designed for self-cleaning and maximum flow		Outlet, reduction available Ø63 / Ø75
63 L/min. Flow rate		Inlet, reduction available Ø40 / Ø50
Pipe connection can be glue fitted or push fitted with available gaskets		
Chemical resistance		
Impact resistance		

Installation Hints

- 1- To remove knock-out plugs, place the opposite side of drain on firm surface then knock out plug using hammer and extension rod.
- 2- Installing the odor trap:
Tilt odor trap so that the bottom section enters outlet.
- 3- Then, firmly insert odor trap into outlet (applying greasers as recommended).
- 4- Ø75-Ø50 and Ø50- Ø40 reductions fit inside inlets or outlet.

DRAIN COVERS

Drain Covers With ABS Upper Section:

- 10x10 cm.
- Anti-scratch with engraved Kessel logo.
- Made of stainless steel 304.
- Anti-rust cover with adjustable upper section made of ABS.
- Modern and elegant designs for luxurious bathrooms.
- Smooth surface with no sharp edges.

INSTALLATION INSTRUCTIONS

Kessel system installation guide

I. Pipe and fitting preparation and joining

- 1. Ensure the quality of the gasket installation in the part.
- 2. Specify the suitable overlap length.
- 3. Cut the pipe normally.
- 4. Chamfer the sharp end in angle between 15° and 45° in which the remaining wall thickness shall be at least 1/3 of the original thickness.
- 5. Clean the socket and spigot end.
- 6. Use smart home grease.
- 7. Remove the excess produced from cutting process.
- 8. Jointing (push the spigot end into the socket until it's fully in place).

Cutting

Chamferring

Cleaning

Lubricating

Jointing (push the spigot end into the socket until it's fully in place)

II. Pipe line installation instructions:

- 1. All Kessel systems are designed to drain wastes in atmospheric pressure only with temperatures up to 95°C.
- 2. The horizontal lines shall be inclined as shown:

The inclination will be according to the following equations:

Pipe diameter	Equation
From 32mm to 75mm	$(M-N)/L \times 100 \geq 2\%$
From 90mm to 200mm	$(M-N)/L \times 100 \geq 1\%$

M: The larger height from the pipe surface to the reference horizontal plane.

N: The smaller height from the pipe surface to the reference horizontal plane.

L: The horizontal distance between the first and last clamps.

- 3. The two parts should be well aligned.
- 4. Kessel Fittings should always be laid out as fixed points, e.g. installing two clamps right before and after the socket.
- 5. The clamp should be installed carefully near the socket area to prevent ovality in the socket, which may affect sealing quality.
- 6. The distance between the clamps for horizontal and vertical installations should not be greater than the values in the next table.

DN	Horizontal Distance (cm)	Vertical Distance (cm)
32	50	120
40	50	120
50	50	150
75	80	200
90	90	200
110	110	200
160	160	200
200	200	200

- 7. When installing heavy duty lines like the horizontal headers that receive high flow rates from one or more water columns, a steel structure member such as beams and angles must be used to hold the pipes, in order to maintain alignment and withstand these heavy loads.
- 8. Additionally, it is recommended to use a pipe between every two fittings to hold structure members or clamps, in order to eliminate slipping or misalignment due to the heavy loads.
- 9. When Kessel pipes are laid in concrete, the socket gaps should be sealed with an adhesive tape in order to prevent penetration of the cement grout.

Material Characteristics

Polypropylene (PP), also known as polypropene, is a thermoplastic polymer used in a wide variety of applications. It is produced via chain-growth polymerization from the monomer propylene.

Polypropylene belongs to the group of polyolefins and is partially crystalline and non-polar. Its properties are similar to polyethylene, but it is slightly harder and more heat resistant. It is a white, mechanically rugged material and has a high chemical resistance. Polypropylene is the second-most widely produced commodity plastic (after polyethylene) and it is often used in packaging and labeling. In 2013, the global market for polypropylene was about 55 million tons.

PHYSICAL PROPERTIES

Density	905 Kg/m ³
Yield strength	30-32 MPa
Flexural Modulus	1300-1500 Mpa
Charpy Impact Strength, notched (23 °C)	60 kJ/m ²
Charpy Impact Strength, notched (-20 °C)	6 kJ/m ²

*These values may subjected to minor changes

CHEMICAL
CHARACTERISTICS

Selected chemical-resistance classification data for PP according to ISO/TR 10358

Concentration and/or purity of the fluid	Dil Sol.	Dilute aqueous solution at a concentration equal to or less than 10%
	Sol.	Aqueous solution at a concentration higher than 10% but not saturated
	Sat Sol.	Saturated aqueous solution, prepared at 20°C
	tg	At least technical grade purity
	tg-s	Technical grade, solid
	tg-l	Technical grade, liquid
	tg-g	Technical grade, gas
	Work Sol.	Working solution of the concentration usually used in the industry concerned.
	Susp.	Suspension of solid in a saturated solution at 20°C
Chemical resistance	S	Satisfactory resistance The pipes can be used for applications in which they are not subjected to pressure or other stresses; for applications in which they are exposed to pressure, the final assessment shall be on the basis of subsequent test under pressure.
	L	Limited resistance The pipes can be used for applications in which they are not subjected to pressure or other stresses, but in which a certain amount of corrosion can be accepted; for applications in which they are exposed to pressure, the final assessment shall be on the basis of subsequent test under pressure.
	NS	Resistance not satisfactory The pipes are seriously attacked: they shall not be used for either pressure or non-pressure applications. There is no point in conducting tests under pressure as the pipes would be certain to fail these tests.
